UPS US VOICE PROCESS

THE DELIVERY CHANGE PLAYBOOK

A practical guide to delivery-change request paths

PROCESS TRAINING

DCR
DCO
UDI

THREE ROUTES.
ONE DELIVERY GOAL.

Same shipment problem. Different request path.

First identify who is asking for the change.

01 / CSE-LED

DCR

A customer contacts support to request an eligible delivery change.

02 / CUSTOMER-LED

DCO

A recipient uses self-service to request an available delivery option.

03 / SHIPPER-LED

UDI

The shipper requests an intercept before the shipment is delivered.

KEY IDEA Identify the requester before explaining the options.

Who starts it — and what changes?

A

DCR

Customer → CSE

Support-assisted change

B

DCO

Customer → self-service

Recipient-led change

C

UDI

Shipper → UPS

Intercept before delivery

All requests depend on eligibility, shipment status, shipper restrictions and the applicable UPS process.

Delivery Change Request

Customer → Customer Support Executive

CLARIFY → CHECK → ACT

When a customer needs to change the delivery plan, the CSE checks what is allowed and explains the next step.

THE CSE PLAYBOOK

1. Verify shipment and customer details
2. Understand the requested change
3. Check availability, restrictions and fee guidance
4. Submit or explain the approved next step
5. Recap what happens next

Do not promise an option or delivery date unless the system confirms it.

Choose the change that matches the need

01

Alternate delivery

Check the eligible alternate delivery choice available for this shipment.

02

Change of address

Request a different address only if the shipment is eligible and the process permits it.

03

Hold for pickup

Check whether pickup at an approved UPS location or Access Point is available.

CSE reminder: confirm the exact option shown in the system before advising the customer.

Two more requests to recognize

04 / DELIVERY

Redeliver to my address

Useful when the package was redirected or held and the customer wants delivery to the original address. Follow the process shown for that shipment.

05 / RETURN

Return to shipper

The customer requests the package be sent back, if that request is available under the applicable delivery- change rules.

Exact availability can depend on shipment status and UPS rules.

A simple CSE workflow

01

IDENTIFY

Tracking / shipment details

›

02

UNDERSTAND

What change is requested?

›

03

CHECK

Eligibility and restrictions

›

04

EXPLAIN

Options, timing, any fees

›

05

CONFIRM

Action and next steps

A calm explanation is better than a fast guess.

Delivery Change Option

Customer → self-service

THE IDEA

The recipient uses an eligible online option instead of asking a CSE to submit the request.

TYPICAL REQUEST PATH

01 Open UPS tracking or UPS My Choice

02 Select the eligible shipment

03 Choose the option displayed

04 Complete required verification

05 Review and submit the request

If an option is missing, the shipment may be restricted or ineligible. Follow the displayed guidance.

Five options — training draft

Confirm this list against your training material before presenting.

01 **Reschedule delivery**

Move delivery to another eligible date.

02 **Hold for pickup**

Collect from an eligible UPS location.

03 **Reroute / new address**

Deliver to another eligible address.

04 **Leave with a neighbor**

Only where available and permitted.

05 **Delivery instructions**

Provide eligible guidance for the driver.

DCO options vary by eligibility, account, shipment and shipper restrictions.

Self-service is convenient — not unlimited

01 / RESTRICTIONS

Shipper restrictions

A shipper may limit which delivery changes the recipient can request.

02 / ELIGIBILITY

Shipment eligibility

Package type, status and service rules can affect available choices.

03 / CHECK FIRST

Fees and verification

Some requests may require identity checks or incur fees. Check current details.

Avoid quoting fixed prices or membership benefits unless current UPS tools confirm them.

UPS Delivery Intercept

Shipper → UPS

THE IDEA

The shipper requests a change to an eligible shipment after handing it to UPS but before delivery.

FOUR CORE INTERCEPT OPTIONS

1. Return to sender
2. Deliver to another address
3. Reschedule delivery
4. Hold for pickup (Will Call)

An intercept must be requested before delivery; fees may apply if completed.

Request → review → intercept

01 / SELECT

Identify shipment

Use the appropriate UPS shipping history or tracking tools available to the shipper.

02 / CHOOSE

Select intercept

Pick return, reroute, reschedule or hold for pickup based on available choices.

03 / CONFIRM

Check status

Submit the request and review the status; don't assume it is complete until confirmed.

Eligibility, timing, service rules and charges may affect whether an intercept can be completed.

DCR vs DCO vs UDI

PROCESS	WHO STARTS IT	HOW IT'S REQUESTED	CORE IDEA
DCR	Customer	Through a CSE	Support-assisted change
DCO	Customer / recipient	Self-service	Recipient-led change
UDI	Shipper	UPS shipper tools	Intercept before delivery

First question to ask: Who is requesting the change?

One package. Three possible paths.

A shipment needs to go somewhere different before it reaches the recipient.

IF THE CUSTOMER CALLS

DCR

Check the request and available options through the support process.

IF THE CUSTOMER USES ONLINE TOOLS

DCO

Check the options displayed in eligible self- service.

IF THE SHIPPER REQUESTS IT

UDI

Check intercept eligibility before delivery.

Same goal, different request path. Verify the shipment and follow the approved workflow.

MISSION COMPLETE

THANK YOU.

WE CAME. WE LEARNED. WE DELIVERED.

Questions? We're all ears.

DELIVERED

NO MORE HOLD MUSIC

SLAYED IT
